Executive Assistant to the Forestry Program Non-Exempt Employee

Forests cover more than 75% of the New York City watershed. This forest provides an economic base for local communities while providing clean water to ten million New Yorkers. This 2,000 square mile “working landscape” delivers 1.3 billion gallons of drinking water each day. More than 60% of the NYC watershed forest is privately owned. The WAC Forestry Program supports the people who own, work and benefit from this forest land by:

1. Helping family forest owners care for and enjoy their woods through WAC’s MyWoodlot.com website and forest landowner education programs.
2. Connecting students, teachers and the general public from NYC and the upstate watershed with the forests that protect the quality of their water through WAC’s Urban/Rural Education Initiative.
3. Increasing awareness of the connection between forests and water quality among loggers, landowners, foresters and the general public through WAC’s Model Forest Program.
4. Working cooperatively with loggers, landowners and foresters to implement Best Management Practices that protect water quality
5. Increasing the number of trained loggers that serve a vital role in supporting working forests by supporting Trained Logger Certification (TLC) in the Catskill and Lower Hudson regions.

The Executive Assistant to the Forestry Program will be part of a team with responsibility for implementing these programs and more.

Required Skills and Abilities:

- A robust knowledge use of Microsoft Office Products
 - Microsoft Access - table design, entry and sorting.
 - Microsoft Excel - creating tables, sorting fields and mail-merge
