

Watershed Agricultural Council – General Policy Policy Formation

The Watershed Agricultural Council [WAC] shall develop and implement policies that address administrative and programmatic issues using the following procedure.

The Program Committee will develop policies relevant to that committee's program and send it to the Executive Committee for review. The Executive Committee will review the policy for proper formatting; confirm that it does not contradict another policy or process, and that it is consistent with WAC's mission and budget constraints. The Executive Committee may send the policy back to the particular committee for rewording or send it on to the Council of Directors for approval.

Guidelines

1. Wordsmithing shall only be done at the Program Committee level.
2. The potential policy shall be mailed in the Council 10 days prior to the Council meeting.
3. If Directors have concerns, these concerns must be addressed with the WAC Chair prior to the Council Board meeting.
